

Software to resell and redeploy your medical equipment

Make data-driven decisions with our pricing engine, manage offers from multiple buyers, and run your remarketing and redeployments from your computer or mobile device.

Software that works for you

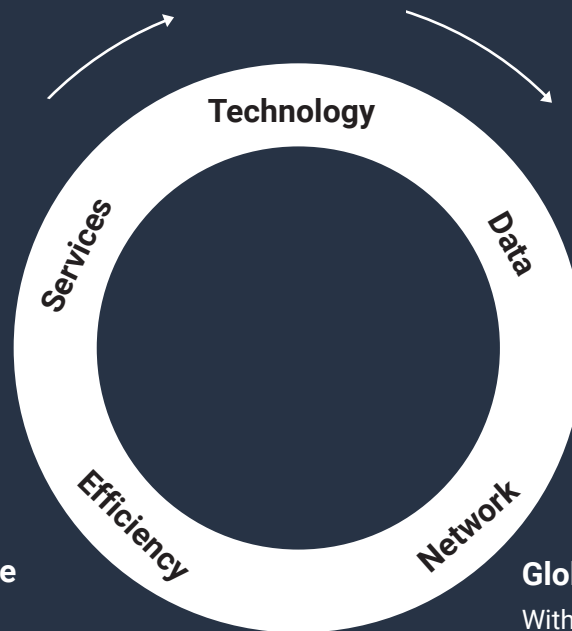

The Medinas software platform is free to use for selling your pre-owned medical equipment. Our fully secure cloud-based platform gives you full control and transparency into your sales process from anywhere at anytime.

Get the services you need

We stand by every transaction, providing payment escrow, logistics support, 24/7 customer service, installation / deinstallation, certified data wiping, inventories, room moves, and more. Medinas is there for you every step of the way.

Know what your pre-owned equipment is worth

Our data engine gives you real-time pricing so you can make data-driven decisions around the orderly liquidation values of your assets, and make sure you're getting the right price.

Manage your sales from one interface

Our easy-to-use offer management and logistics tools meant you can work with multiple buyers and on multiple sales at once to save time, get the best price, and focus on getting back to work. All from your computer or mobile device.

Global vetted buyer network

With over 1,000 vetted buyers, our ever-growing network of high-quality buyers helps guarantee you're selling to quality businesses to ensure easy and streamlined transactions.
